Unity Game Developer experienced working independently and within small development teams, with two published games showcasing hands-on experience taking projects from development to release.

EXPERIENCE

RavenTainments — *Unity Programmer*
Duration: 6 Months
Worked as the sole Unity developer and programmer in a small game development team. Responsible for implementing gameplay systems, programming core mechanics, and supporting the development of *Bennie Boom Dash*. Collaborated with team members to turn game design concepts into a playable mobile game while maintaining and improving project functionality throughout development.

PROJECTS

Nightmare Pill — *3D Anomaly Horror* — GitHub - Bazaar
Role: Game Developer (unity programmer - Game Designer).
Designed and developed a 3D horror game featuring anomaly-based gameplay, enemy encounters, and interactive game mechanics.

Desert Surfers — *3D Endless Runner* — GitHub - Bazaar
Role: Solo Developer (unity programmer - Game Designer).
Developed a 3D endless runner for Android, Implemented obstacle spawning, currency collection, skin system, and mobile optimization.

Bennie Boom Dash — *2D Endless Runner* — GitHub
Role: Unity Programmer.
Worked as the solo programmer in a small development team. Implemented gameplay mechanics, player controls, UI systems, and core game functionality using Unity and C#

Defence Against Pests — *3D Strategy Defense* — GitHub
Role: Solo Developer (unity programmer - 3D Artist - Game Designer).
Designed and developed a 3D top-down strategy game featuring resource management, farming mechanics, defensive structures, and enemy AI systems.

Zombie Killer — 3D *Survival Shooter* — GitHub
Role: Solo Developer (unity programmer - Game Designer).
Designed and developed a wave-based survival shooter with zombie AI, weapon upgrades, currency systems, and player progression mechanics.

SKILLS

- Unity Engine
- C#
- Object-Oriented Programming (OOP)
- Gameplay Programming
- Game Optimization
- Scriptable Objects
- Addressables
- Animation System
- State Machines
- Mobile Development
- Physics
- Debugging
- Profiling
- AI Systems
- Unity UI
- Git & GitHub
- Blender (Basic)
- Photoshop (Basics)

AWARDS

- **Developed multiple complete Unity game projects independently**
- **Built gameplay systems such as AI, wave spawning, and upgrade systems**
- **Published multiple playable games and projects on GitHub**
